The MultiFlex ERP system is an integrated set of ERP applications for Manufacturing, Distribution and Retail -- designed to excel in the range of applications addressed as well as in flexibility, responsiveness, and ease of use.

Our experience

Located in Markham, Ontario, Canada's high-tech capital, Microhouse Systems has provided flexible solutions specifically for retailers, distributors, and manufacturers for 20 years. The MultiFlex ERP software is designed by supply chain management specialists and reflects industry wide best business practices.

We customize

As we realize that every company is different, we will customize our software to reflect the unique requirements of our customers. Customizations are done quickly, reliably and economically.

Quick ROI

The MultiFlex ERP has helped numerous companies increase the efficiency of their workflows and communication, making a positive impact on their bottom line profits and competitiveness. Our goal is to make an enterprise business software system available to smaller companies and budgets. The software is cost effective and carries a quick ROI for virtually any user.
